1 of 1

Define your problem statement

Write down the problem statement that you want to solve. This will be the focus of your brainstorming session.

Brainstorm

Write down all ideas that come to mind. Do not worry about whether they are good or bad. The goal is to generate as many ideas as possible.

Group ideas

Take your brainstorming ideas and group them into categories. This will help you to see the big picture and identify the most important ideas.

Prioritize

Take your grouped ideas and prioritize them. This will help you to focus on the most important ideas and ignore the less important ones.

Activate Windows

Go to Settings to activate Windows.
